© Aging Safely, Inc. 2006-2015

The following instructions are for the **Facility Locator** tools to access our database of Long Term Care Facility information. These instructions and definitions are meant for people searching for a facility on Aging Safely's web site ([www.AgingSafely.com](http://www.AgingSafely.com)) as well as the Facility Providers when providing data to us. On the actual web interface there are several rectangular blue buttons, such as the  or "**[Instructions »](#)**" button. Because this document is written using Microsoft Word, showing them accurately is not easy. The [»](#) symbol is a hint that link will be brought up in a new tab or page rather than in the current one. Please see the [Screen Shots](#) for what these buttons and screens look like.

## **Device and Browser Support:**

All of the AgingSafely.com website is designed to work with computer screens (HD and old style), tablets and even with Smart Phones in landscape mode. Like most sites, the bigger the screen the easier the pages are to view and the buttons to click. The site is written in HTML5 and uses the meta-tag "viewport" and "@media screen and (max-width: 300px)" commands as needed. Telephone numbers are underlined and clicking on them from a Smart Phone should dial the number for you.

AgingSafely.com is tested with recent versions of Google Chrome, MS Internet Explorer, Firefox and Apple's Safari browsers. We don't list "supported versions" here because the browser companies change them frequently. MS Internet Explorer must be at least version 9.

## **Screen Photos:**

- [Facility Search Criteria](#)
- [Selected Facilities](#)
- [Details Page](#)

## The search tools consist of several parts:

- 1) **Facility Search Criteria** --- This is the area that you enter the information about the geographic, language and financial (Medicaid) preferences of the client as well as the types of medical capabilities that might be required in a facility. **Select a City** and **Within Miles** in the top two pull-downs and get a list all of the facilities within a given distance, regardless of the city that they are physically located in. **Note:** Like most web-browser pull-down lists, "**Select a City**" allows the user to type the first letter of a city's name and jumps to that section of the list. Also up-arrow and down-arrow also work here. The default values are "Within 15 miles" and "Select a City" which is a special value that selects all cities. **For this tool to be useful you should select a city.** There will also be a pull-down that shows "Adult Family Homes" and may optionally have other values as well.

**Refine your search by checking the check-boxes that match the client's *medical needs*.**

One of the somewhat unique features of this interface is the lack of a "Submit" button. As the user checks boxes that describe the client's needs, desires, and financial status – the list of "Selected Facilities" gets smaller as those facilities that do not offer the desired services drop off the list. If the user's choices are too restrictive the system will show that ZERO facilities meet the criteria. If this were done using a "Submit" button the users wouldn't discover the problem until the very end.

Normally changing the "Desired City", increasing the "within miles" or un-checking boxes and checking others will allow you to get any selection. There is a red "**Reset Form & Selection**" button that will re-load and reset the page to its original state. In older versions of this page this was "**Reset Form – click twice**" button.

**Special Guests:** If you are logged into Aging Safely in an account with greater than the normal public access, you may see more selection choices and more data presented. Extra columns on the right of the "Selected Facilities" section may also be visible. Extra **Selection Criteria** may include items such as:

- a) A pull-down for **Mode** that shows "*Hosted at ASI*", "*Data is Current*", "*All WA Facilities*" and other selection choices.
- b) A pull-down for **Desired Facility Type** that shows "*Adult Family Homes*", "*Assisted Living Facilities / Boarding Homes*", or "*Nursing Homes*" or "*All LTC Facility Types*". With this selection change additional rows of selection that are appropriate for the selected facility type will be made visible, since a one-size-fits-all form doesn't work well for the wide range of capabilities of the three types of facilities.  
**Note:** This functionality is still in development and a work in progress.

- 2) **Selected Facilities** --- This is a list of facilities that match the current search criteria. As your search criteria become more specific, the number of selected facilities will decrease. The list starts out as a multi-page list of all of the homes and decreases as you add criteria. It may actually decrease to **ZERO** and say "**Error - No Matching Results!**" If this happens, re-check the selections that you have made. You

may have to alter your selection criteria if no facilities match what you have checked.

There may also be a more than one page of facilities. At the bottom of the “**Selected Facilities**” list are links to other “pages of the listing if your list of selected facilities is larger than the number of **Records per Page**. You can change the **Record per Page** value, **BUT** you will have to re-make your selections after doing so. The **Records per Page** pull-down ranges from 10 to ALL records.

The list of **Selected Facilities** includes buttons for [Details »](#) and optionally [Web »](#) that will bring up, in a separate window or tab, a page of details on the facility, and its web site with pictures of the facility and other information. Please look at the **Details Page** first, since some AFHs want their [Web \\* »](#) to point to a web site that wasn't created by Aging Safely and may not have the data that we require. There are other possible items that may be shown here such as [Brochure »](#), [Video »](#), etc.

You will notice that facility addresses are underlined. Clicking on the underlined street-address will bring up a map to the facility using Google Maps. You can get directions and often a “street view” from Google Maps. Phone numbers are also underlined. If you are calling from a Smartphone (iPhone, Android etc.), clicking on the underlined phone number will dial it for you.

There is also a [Print Table »](#) button that will bring up a window with just the current page of selected facilities for printing. It is usually best if you print this page in **Landscape Mode**. Landscape mode is set in your browser's print dialog box. **Note:** How you select Landscape Mode or Portrait Mode varies by browser type (Internet Explorer, Firefox, Chrome, Safari, etc.) and operating system (Windows, OSX, Linux, IOS, etc.) **Once you have narrowed your selection you should print this table and use it to contact the selected Adult Family Home providers.**

A green disk  in the left hand column indicates that the facility has a “**Known Vacancy**” even if vacancy wasn't part of your search criteria. *Known Vacancies* indicates that the facility has **recently updated** its vacancy information.

An orange disk  in the left hand column indicates that the facility **may** have a “**Possible Vacancy**”. We use the *Possible Vacancy* indicator when the vacancy information is not a recent as we would like, or when the facility has rapidly changing vacancy information and/or information could be “stale.” **You will need to phone the facility to find out about their current vacancy status.**

A blue disc  indicates that “**Additional Information**” may be available. Holding the mouse of the information icon will display the type of information. Clicking the icon may take you to the original source of the information. This icon may be used on any type of page.

- 3) On the **Details Page** there is a Map showing the location of the AFH. Clicking on the Map provides a more detailed and dynamic map, with a way to get driving directions. There may also be a link to the facilities' **Web Site**. Since the **Details Page** appears in its own window or tab, The [Close Tab or Window – Return to Locator](#) button just closes its window or tab and returns you to the previous tab or window. There is a [Print Page »](#) button on the Details Page as well.

Aging Safely's data comes from several sources, as a result there are several “update” dates shown on the Details Page, near the bottom:

- a) The date that this page was printed or displayed. (Printed: mm/dd/yyyy)
- b) The date that any fields other than vacancy, last tour, or DSHS data were updated. (Last Update: mm/dd/yyyy)
- c) The date that we last “refreshed” data from DSHS. i.e. Name, Address, Licenses, Enforcement Letters. (DSHS Data: mm/dd/yyyy)
- d) The date that vacancy information was last updated. – We try to contact everyone at least once per month. The provider can contact us anytime with a vacancy update. (Vacancy last updated : mm/dd/yyyy)
- e) Aging Safely's most recent recorded facility tour. Data started being consistently recorded 1/1/2012 as part of RCW 18.330

**Note:** Also near the bottom are “blue buttons” to [Disclosure Info »](#) and to [Instructions/Definitions »](#) (this document.) There are also a “Disclaimer”, “Copyright” information and a link “[Latest Enforcement Notices](#)” to DSHS’s most current Enforcement Letters regardless of how recently we have updated the data from DSHS. There may also be a “[Disclosure of Services](#)” link to a DSHS form.

### Facility Search Criteria and Details Page Definitions:

- **Specialty License:** Washington State licenses AFH specialties: **Dementia, Mental Health** and **Developmental Disabilities**. If a patient has a **primary diagnosis** of *Dementia, Mental Health* or *Developmental Disabilities*, then the AFH must have the corresponding specialty license.
- **RN/LPN Provider or Manager** indicates that the AFH Provider or the Resident Manager is licensed in the State of Washington as an RN, ARNP or LPN.
  - **Instruction to Providers:** “Checking this requires that you provide us with resident manager’s name and license information and **notify us upon changing resident managers**. This field isn’t needed if the Provider is an RN or LPN licensed in the State of Washington.
- **Vacancy:** Indicates that this facility has a current vacancy.  
The four vacancy choices are:
  - **Single Room with Private Bath** --- **Note:** We do not require a full bath; a private half bath is sufficient since most AFHs also have a large roll-in shower to make it easier for caregivers to help with this activity.
  - **Single Room** --- This search selection with select both facilities with Single Room with Shared Bath and with Single Room with Private Bath.
  - **Shared Room** --- Since all shared rooms also have a shared bath, there is only one Shared Room selection.

- **Any Vacancy** --- This selects facilities with any type of vacancy.
  
- **Has House Doctor Available** --- In some major metropolitan areas there are groups of Primary Care Physicians that specialize in treating the elderly; these doctors will make house calls to Adult Family Homes for their patients and they usually accept payment from Medicaid or Medicare.
  
- **Awake Night Shift** --- Some facilities rely on call buttons and electronic monitoring of residents during the night shift. Others have an **Awake Night Shift** that is doing food preparation, light housekeeping and other tasks at night in addition to caring for residents. If your loved one is up several times at night, they will need a facility with an **Awake Night Shift**.
  
- **Insulin Delegation** --- Caregivers have completed the DSHS certification program to allow non-RN/LPNs to give insulin injections **and** the AFH's Nurse Delegator is willing to delegate this.
  
- **Injection Capability** --- (for other than insulin) means that an RN/LPN is available to give injections 7 days a week when needed. This is not an ad-hoc capability.
  
- **Hospice / End of Life** --- Indicates that the facility accepts residents that are currently in a hospice program. Since not all areas have formal hospice programs **End of Life** is also included.
  
- **Two Person Assist / Hoyer** --- The cost and staffing of a facility are affected by the care that is required by the residents. A resident that requires two people to assist them with transfers impacts staffing and not all facilities are staffed for that level 24 hours per day.
  
- **Foley Catheter** --- A Foley Catheter is a urinary drainage tube. Facilities need to be trained in daily management of this system as well as what to look for if a problem develops.
  
- **Ostomy Care** --- There are three common Ostomy — colostomy, ileostomy, and urostomy. Training is required for any Ostomy care. For more information go to [www.uoaa.org](http://www.uoaa.org).
  
- **Peg Tube** --- A feeding tube.
  
- **Rehabilitation** --- Rehabilitation usually involves physical therapy, occupational therapy, or speech therapy. Caregivers need appropriate training to follow guidelines set out by these therapists.
  
- **Wanderers** --- A Wanderer goes from room to room inside of their facility. This may cause anger and frustration with other residents.

- **Exit Seekers** --- An Exit Seeker tries to escape from the facility where they live. This can be constant and extremely aggressive. Any facility considering an Exit Seeker needs at a minimum alarmed windows, doors, and a secure yard. Depending on the amount of exit seeking being done, a completely secure facility may be necessary.
- **Resistive to Care** --- A resident who is resistive to care will attempt to refuse portions of their care or all attempts to help them. This can include medications, toileting, showers, ambulation, and food.
- **Ventilator/Tracheostomy** --- A ventilator is a mechanical breathing device. All ventilator patients have a tracheostomy---a permanent opening in the anterior throat. Facilities that care for these patients have 24/7 licensed nurse care. Appropriate training and experience is required.
- **History of Drug and Alcohol Dependence** --- A patient with a history of drug or alcohol abuse/dependence may have lingering behaviors. Some patients may have a doctor's order for a limited amount of drug or alcohol.
- **Traumatic Brain Injuries** --- Traumatic Brain Injury Patients require specific training and experience. See [www.cdc.gov/traumaticbraininjury](http://www.cdc.gov/traumaticbraininjury).
- **Stroke** --- Able to accept residents who have had a stroke.
- **Oxygen** --- Able to accept residents on oxygen.
- **Multiple Sclerosis or Parkinson's** --- Able to accept residents with MS or Parkinson's disease.
- **Currently has clients under age 60** --- MS and **Parkinson's** patients are often younger. This criteria indicates that the facility already has one or more resident under the age of 60.
- **Respite Care** --- Respite care is short-term care that may last up to 8 weeks.
- **Wound Care** --- Wound Care may be simple or complex. Any wound needing skilled nursing care must be in a licensed nurse or be accessible to Home Health Nurse Care.
- **Smoker** --- Some facilities won't accept smokers. Washington state law requires that smoking can only be done outside, so the resident must be able to go outside.

- **Client's Pet** --- Some facilities may consider taking a small well-behaved pet with a client. There should be some conditions around this and most likely a cost to cover the extra work for the staff.
- **Residents with MRSA, C-Diff or VRE** --- MRSA and VRE are resistant bacteria. C-Diff is a spore. All can be life threatening to the Elderly or those with compromised immune systems. Go to [www.cdc.gov](http://www.cdc.gov) for further specific information on symptoms, treatment, and care of these patients in the community.
- **Medicaid** – These check-boxes should be used if the resident is now, or soon will be on Medicaid.
  - **Accepts Medicaid / Has Contract** --- This indicates that the provider will consider a resident that is already on Medicaid, or soon will be, **and** that the AFH already has a Medicaid contract with DSHS.
  - **Accepts Medicaid with Conditions** --- This indicates that the provider has some "conditions" under which the will accept Medicaid. For example, the provider will accept Medicaid as payment if the resident has been a "private pay" resident for 24 months or longer prior to going on Medicaid.
- **WA State Medical Licenses (RN, LPN, CNA, NAR Etc.)**  
**Instruction to Providers:** If **Medical Credentials** (CNA, RN etc.) are in a name different than the *Provider* as shown above, please document the reason – such as *maiden name*. We try to validate all Medical Credentials via HPQA's [Provider Credential Search](#).
- **Optional Buttons**
  - [Print Table](#) or [Print Page](#) --- This button print a section of the page or the whole page.
  - [Map »](#) --- This button will bring up a map in a separate window or tab. Note: Street Addresses that are underlined are usually also links to a map to the facility.
  - [Web »](#) --- This button will the facilities' Aging Safely web hosted site in a separate tab or window.
  - [Web \\* »](#) or [Web II »](#) --- This button will the facilities' non-Aging-Safely web site in a separate tab or window.
  - [Br »](#) or [Brochure »](#) -- This button will bring up a PDF version of the facilities' two-page brochure in a separate window or tab.

- [Video »](#) or [Video Link »](#) -- This button will take you to a video about the facility from some other source than Aging Safely. Note: Since this video comes from another site / URL and Aging Safely is not the originator, we aren't responsible for any copyright infringement. We do have requirements that the video has to meet; such as it can't contain ads, or be from one of our competitors.
-  -- This button will allow the user to extract the Selected Facility data into an Excel spreadsheet. Only special users have this capability.
-  -- This button will allow the user to extract the Selected Facility data into a CSV file. Only special users have this capability.
- **Administration Buttons, Icons or links** (Normally not visible)
  -  -- This button is only functional for database administrators and allows them to edit the database.
  - [EE](#) -- This button allows for the editing of "extended email information".
  - [Close Cities](#) -- This button allows for editing our database of cities that are close to the selected city.
  - There may also be other similar buttons as needs arise.
- **Optional items that may be on the Details Page**
  - **Notes:** --- This is a place to provide details of Medicaid conditions or any other items that a check-box can't address.
  - **Also Experienced In:** --- This is a place for the facility to list other areas of medical specialty that they are especially experienced in addition to those skills from the search criteria.
  - **Other Services:** --- This is a place for the facility to list services such as beautician, activities, etc. that provided by this facility.

### Sorting the Selected Facility Results

The results-table is normally sorted by the distance from the center of the “Selected City”. However the underlined column headings such as [Miles](#), Provider Name: First [Last](#), [Facility Name](#), and [City](#) can also be used as items to sort on. When they are the sort key then a small triangle (or an up-arrow or down-arrow) appears and points up when sorted “ascending” or points down when “descending.”

### “Records Per Page” on the Selected Facility Results

At the top of the results grid is a “Records per Page” pull-down. It defaults to 25. If you set it to a higher number, then you get more homes listed before the pagination links at the bottom appear. These links (Back ... First | 1 [2](#) | [Last](#) ... [Next](#)) allow you to see the additional pages. Of course if the search criteria results in less than the “Record per Page” number, then there will be no pagination links.

## An Example Search Using Aging Safely's Locator Tool

An example Medicaid patient, "Helen" is at Valley General Hospital in Renton WA needing discharge very soon. Helen has: dementia, weighs 200+ pounds, is diabetic, on insulin, and has fallen before.

Geographic area = **Renton**. A primary diagnosis of dementia requires an AFH with a **dementia** specialty license. The fact that Helen is on Medicaid means that she needs an AFH that "**Accepts Medicaid & Has a Contract.**" Since she weighs 200+ pounds and falls she requires an AFH that can deal with "**two person assists and/or Hoyer lifts.**" Since she is on insulin she needs an AFH where "**insulin delegation**" can be done.

Screen Photos:

An Adult Family Home (AFH) with a homey atmosphere for seniors with skilled caregivers and professional oversight.

[Print Page »](#)   [Web »](#)

[Close Tab or Window - Return to Locator](#)

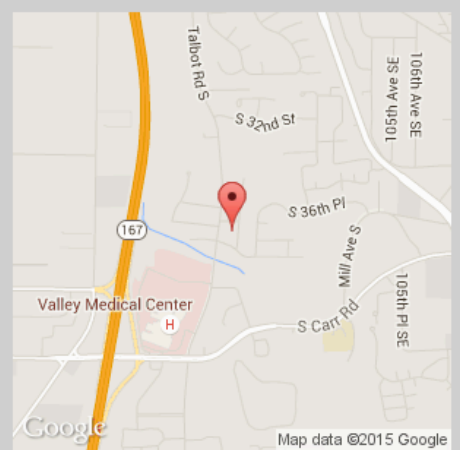

**Golden Home Care AFH 2** is licensed as an **Adult Family Home** with a maximum of 6 beds.  
 4 Private rooms with shared baths **with more than one vacancy**  
 1 Shared room with shared bath

Golden Home Care AFH 2 has the following DSHS contracts:  
 AFH And Expanded Community Svs [i](#)

**Golden Home Care AFH 2** is licensed by DSHS for the following specialties:  
**Dementia   Mental Health   Dev. Disabilities**

**Services provided:**

- **A Registered Nurse is the provider**
- House Doctor contracted with Medicaid / Medicare
- Caregivers certified for delegation of insulin.
- Insulin/Injection Capability
- Hospice and End of Life
- Two Person Assists and/or Hoyer Lift
- Foley Catheter
- Ostomy Care
- Care for clients with a Peg Tube.
- Rehabilitation
- Accepts Wanderers

Click Map for a Dynamic Map and Driving Directions

- Accepts residents that are resistive to care
- Care for clients with history of Drug/Alcohol Abuse.
- Care for Traumatic Brain Injured.
- Care for clients after a Stroke.
- Care for clients on Oxygen.
- Would consider Respite Care
- Would consider Wound Care
- Would consider taking a client's small pet.
- Would consider taking a boarder.
- Would consider residents with a contagious disease  
i.e. MRSA, VRE, C-Diff, HIV/Aids.
- Accepts Medicaid
- We provide an activities program that takes into consideration the residents needs, interests and capabilities.

**Notes:**

Will ramp staffing up to 'Awake Night Staff' when required.

**Languages Spoken:** English, Spanish, Tagalog

---

**Golden Home Care AFH 2** is An Adult Family Home (AFH) with a homey atmosphere for seniors with skilled caregivers and professional oversight.

**Golden Home Care AFH 2** and its staff are experienced with: Hospice / end-of-life, Stroke, Oxygen, Two Person Assists / Hoyer Lifts, Foley Catheters, Ostomy Care, Peg Tube, and managing residents who are Wanderers, or are Resistive to Care. We have caregivers certified for delegation of insulin. We have *injection capability* and will consider residents on sliding scale insulin. Monitoring residents at night. We have a primary care physician available (House Doctor) who will make house calls and accepts Medicare and Medicaid. and Medicaid.

We are located in Renton WA. Residents typically come from Renton and the surrounding communities; Seattle, Tukwila, Newcastle, Mercer Island, Sea Tac, Kent and Burien. They come to us from; their own homes, retirement communities, assisted living, boarding homes, rehab facilities, nursing homes and other similar senior/elder care facilities.

Please call **206-683-8634** for more information or an appointment to view our facility. --- **Editha Valdez, RN**

4. Aging Safely maintains a "sample" web site for advertising purposes <http://Basic.AgingSafely.com>. It is a good example of the type of web sites that we build. Adult Family Homes can provide additional content if the desire, but ours has been selected for several reasons:
  - a. It has the data that hospital discharge coordinators want, in a format they are now comfortable with.
  - b. The text was selected to maximize the possibility of the pages showing up on Google and other search engines. This is called Search Engine Optimization (SEO).
  - c. It is very readable by families looking to place their loved one in a long-term care facility.
  - d. Washington's [Chapter 18.330 RCW](#) (*Elder and Vulnerable Adult Referral Agency Act*)

**Note:** This document, Aging Safely's web site ([www.AgingSafely.com](http://www.AgingSafely.com)), and the web sites of those Adult Family Homes that we host on the web are: © Copyrighted by Aging Safely Inc. 2006-2015 All rights reserved. ### Search Engine Optimization & Copyright Infringement

Aging Safely Inc. has spent a great deal of time and research into selecting the on-page text to describe the Adult Family Homes that we list on our web site. Many sentences have been crafted to contain the search-terms that both medical professionals and the lay-person would likely use to do a Google-search to find an Adult Family Home for their loved one. Our paying customers have a non-exclusive license to use these descriptions as long as they are paying customers. Should they stop being customers, the license is no longer valid. If they use these descriptions on any web site at that time, they are violating our copyright listed above. We routinely search the web for these important phrases. We currently search for about a dozen key phrases that are long enough to clearly come from our sites. When we find a violation we file an "Official Notice of Copyright Infringement" with the site's Internet Services Provider (i.e. the company hosting the site.) They usually will drop the offending pages within 4 days, unless the offending party changes the text enough to no longer violate our copyrights. Please do not use this document or our web site as a template for designing your own.
